# Department of DT

# ICDT6004 – Web Technologies

# Labsheet 1 – Basic HTML

## Question 1

• Launch notepad++/SublimeText.

• Type the code on slide 4 of the lecture notes. Save the file as firstpage.html.

• Launch the file in browser by double-clicking on the file icon.

## Question 2 - headings

• In a new file, type the codes on slide 9 of the lecture notes. Save the file as headings.html.

• View in browser as above.

• Modify the above code to include the tags <h2>, <h3> upto <h6> with some text of your choice. Save the file and view in browser.

## Question 3 - lists

• In the same file as in Question 2, type the codes on slides 12 and 14 of the lecture notes. Save the file and view in browser.

## Question 4 - images

• Insert an image that you have downloaded from the internet or from the Pictures folder on your laptop into the headings.html file.

• Investigate the height, width and alt attributes of the <img> tag.

## Question 5 - links

• In headings.html, insert a link in the page to open firstpage.html. Investigate the target attribute.

• Insert another link that launches the default email client on your laptop with the email address 'test@uom.ac.mu'.

## Question 6 – Anchor and local navigation

• Add a link to the bottom of the page with the text 'Top of the Page', it should point to the top of the page.

• Investigate the use of the <a> tag for local navigation.

## Question 7 – Putting everything together

Create the homepage of a website on your favourite movie. You will have to include everything that you have learnt in class upto now. You will also need to investigate how to add colour to a website without using css for the time being.
